Re: U.S. Patent Application for  
**TELECOMMUNICATIONS TRANSMISSION TEST SET**  
Our File No.: 16845-3

Dear Peter:

Enclosed is a revised copy of the above-identified patent application. Please forward the application to the inventors for their review. To assist you with the review, the revised texts are underlined and noted by a bar on the left margin.

Regarding Figure 3, it would be helpful to include a more detailed description of the DMM test circuit (322), the TDR test circuit (324), and the line impairment test circuit (326). Any information you can provide for these circuits would be helpful. If these circuits are described in any literature, we would be appreciated a copy of the literature or directions on how to locate them.

Also, please provide us information on the home address and citizenship of all inventors.

After the review, please send us any comments, suggestions or changes deemed necessary or appropriate. We will make the necessary changes to the application and will send a final version to you for review and signature.

Please let us know if you should have any questions or comments.

Very truly yours,

Truong Dinh
